

Kicking Cancer's Ass ~ Freedom Research

Thomas W. Lippitt, Rinard Mills, Ohio

The following submission originally ran in the March 1994 edition of Active Voice. It is being published once again here to coincide with this special series on cancer and health and healing. The author, Thomas Lippitt, has been a frequent participant at the Active Voice podium since its inception in 1988. Thank you, Mr. Lippitt, for utilizing this forum to share with others, for serving as a catalyst for my own research and studies related to medicine and monopolies, and for your friendship. An additional cancer and health and healing related article written by Lippitt and first published in the July 1995 Active Voice ("Cancer: The battles beyond the war: A history of suppressed cures & healings") will air in next month's instalment of this series.

Information given in this article is not to be construed as medical advice in any given shape, form or matter, but is information given solely for educational purposes. The author is a medical researcher and former officer of Cancer Victims Anonymous.

Due to publicity about bone marrow transplants being done at a cost of \$150,000 to attempt to treat leukemia, we felt that information about less costly alternative treatments would be of interest.

Our organization was started about 1974. At that time the monopolistic medical profession in the U.S. only used methods to treat cancer that were "approved" by the AMA and the FDA and consisted of surgery, radiation, and the use of toxic chemicals. The situation has not changed as of today.

In 1974 thousands of Americans went to foreign countries to obtain "alternative medical treatment" for cancer and other diseases as the medical monopoly would not allow doctors in the U.S. to use any but "their approved treatment." In all of history any time a doctor came up with a new treatment the then "medical profession" would instantly label him a "quack." The doctor who discovered penicillin was so labeled. The situation is the same today.

I personally do not know of one person who was a friend or acquaintance who was treated with radiation or chemotherapy who has survived. A minute few have survived

after surgery. On the other hand, I know of hundreds who have survived and continue to survive who have been treated with "alternative treatment," mainly consisting of diet, use of vitamins and enzymes, and laetrile and chelation therapy.

We discovered that the average expense to treat a cancer patient in the U.S. before the "established doctors" escorted them to the graveyard in 1974 was \$17,000. The survival rate under their care was then at the most seven percent. As a result, we referred patients to Dr. Ernesto Contreras, M.D., Central Medico Del Mar, Tijuana, Mexico. The cost in 1974 to fly to California, go by bus to Tijuana and be treated for three weeks as an out-patient was \$1800. The patient would then continue to treat himself with diet, vitamins and enzymes.

The late Walter Ermer became so angry when his 27-year-old son died a painful death from cancer in 1965 that he investigated cancer treatments the world over until he died. Statistics obtained by him in 1976 showed that of 146 cancer patients using diet, vitamins, enzymes, etc., 127 managed to remain alive - many for over six years. On the other hand, of 173 cancer patients treated with the conventional methods used by doctors in the U.S., only 11 managed to survive.

Being pragmatic about the different method of treatment, we discouraged people from having treatment in the U.S. Hundreds of people in the Cleveland area who could not even afford to go to Tijuana went on a diet and nutritional program and also managed to survive! Those who could not or would not discipline themselves to stay on the diet, etc., did not survive.

After Walter Ermer died the Cancer Victims Anonymous organization pretty well collapsed and new cancer victims did not know of the organization, so the membership decreased as people moved away. From my memory bank I would like to tell you some success stories of patients using diet and nutritional therapy.

A well-known architect from Cleveland, Robert W. Stickle, came down with malignant melanoma. He went to University Hospital where he was operated upon. The cancer came back and he was operated upon two more times and each time the cancer came back. At that point he told the doctors: "I know you fellows mean well, but obvi-

ously you don't have the answers to my problem," and he immediately went to Dr. Contreras. He has continued to treat himself and is still alive and well as of this writing. His first cancer showed up November 15, 1968. As far as I know he is the only person I have ever known who survived from melanoma regardless of what type of treatment they have received.

A millionaire cancer victim who had one lung already removed found out that his other lung was cancerous. He went to a doctor in Columbus who used chelation therapy, vitamins, enzymes, laetrile, etc. That doctor looked at his medical records and talked with his prior doctors and informed the patient there was nothing he could do, that it appeared hopeless to even try.

The millionaire begged the doctor to try

to help him, and the doctor said he would try if the patient would come to his clinic every day of the week. The patient was treated with chelation therapy and laetrile was added to the chelation solution and he was also placed on a diet plus nutritional therapy. In a short period of time the cancer in the second lung had completely disappeared and as far as I know the man is still alive. He was treated many years ago.

The young daughter of a friend of mine, about eight-years-old, was diagnosed at an eastside Cleveland hospital as having a rare blood disease and there was no hope. We told the parents to send urine samples to a doctor in the Philippines and the report that came back said the daughter didn't have a rare blood disease, but leukemia. The parents could not afford to send her to Mexico, (See Cancer, page 7)

In previous segments:

Especially for those who have been told to go home and die by self-appointed omnipotent medical experts, or who have loved ones being told there is no hope to become healthy again, *Active Voice* Publisher Ron McEntee began his series on cancer and health and healing:

"...One thing I do believe with all my heart is that fear is itself afraid of love. Fear will run from love because it will be destroyed by it. And the first step of being destroyed by cancer is to allow fear to pervade rather than love, and to allow hope to be exterminated rather than nurtured so that it can blossom and grow and bear fruit and heal..."

Part Two of "Kicking Cancer's Ass" included McEntee's emphasis on "The power within" along with a story concerning the history of Essiac called "Ojibwa Herbal Tea: Indian myth or healing remedy?"

In Part Three, "Christine's story" was told, a powerful first-person narrative detailing one teenager's bout with cancer, her subsequent victory, and her message to fellow cancer fighters.

In Part Four, "Let the healing begin," McEntee re-aired his previously published reference guide, "Here's to Your Health," for those wishing to begin a self-study into little publicized natural medicinal methods. Reference contacts were shared as well as an urge for people, especially in matters of health and healing, to "always believe in yourself. Believe in your own abilities to love and to be loved, to care and to be cared for, and to search for and draw your own judgements about 'the truth.'"

Part Five featured "Caring about caring cancer," a response to this series from an *Active Voice* reader.

Part Six focused on a "miracle" herb called pau d'arco and its abilities and history of fighting cancer.

Part Seven talked about media and medical monopolies and the dangerous interplay between the two. It also mentioned the names of herbalist Dr. John R. Christopher, scientist Royal Raymond Rife, and "unqualified" healer Harry Hoxsey, whose suppressed healing success stories should and shall be told.

Part Eight talked again of Christopher and offered feedback from readers on pau

d'arco and suppressed healing methods.

In Part Nine, Bob Houchins of Port Charlotte, Florida narrated the story of Royal Raymond Rife, "one of the most fascinating and horrifying tales ever told." Rife was an American scientist who discovered a method and created an instrument that cured cancer in the 1930s. His reward was similar to that given to anyone who attempts to put genuine healing and caring over money and power. Both he and his answers to the cancer problem were driven underground.

Part Ten highlighted and urged self studies of herbal healers Dr. John R. Christopher and Dr. Richard Schulze and the Sam Biser *Save Your Life Herbal Video Collection*

Part Eleven told the amazing story of Harry Hoxsey, who took a handed-down herbal remedy and opened up his first cancer clinic in Illinois in 1924. By the 1950s Hoxsey had clinics in 17 states, but by 1963 the medical establishment and friends in government finally forced him to take his services to Mexico, where Americans who know about it still journey to rid themselves of cancer.

Part Twelve covered "The Legacy of Edgar Cayce." Emphasis was placed on "the father of holistic medicine's 'mind/body/spirit' philosophies and information was shared about related Cayce 'readings,' Cayce health products, and Cayce's Association of Research and Enlightenment, Inc.

Part Thirteen, a submission from an *Active Voice* reader, was a discussion and testimonial involving "Natural Hygiene," also referred to as "Life Science," a health system that teaches how to live in harmony with nature and our biological makeup.

Future segments will cover more centered healers and suppressed information. Also included here will be your stories, comments and questions. Please take part and join a genuine effort to let the healing begin.

For the back issues containing this entire series, send \$10 to Active Communications, Inc. at *Active Voice*, P.O. Box 394, Berca, OH 44017, or call 440/243-4547 with questions or suggestions.

Cancer (from page 6)

so they treated her themselves. That was about 1975. The daughter recovered and is alive and well today.

Two men who were twins called me. Their mother, age 70, was in a westside Cleveland hospital with leukemia. The doctors told the sons that they had given the mother blood transfusions and they could give a few more, but the situation was hopeless. The mother's blood count was terrible, she couldn't walk, and was in pain. I told the sons to take their mother to Dr. Contreras. They did, and after three weeks the mother's blood count was back to normal and she felt great, walked out of the clinic, came home and treated herself. About five years later she died of a heart attack. I could go on and on with other true stories of people who have survived, but I think you now get the picture.

There are articles available that appeared recently on leukemia and/or cancer, including one that appeared in a medical journal telling how 59 people were given the chelation treatment and followed for 18 years. At the end of the 18 years only one had come down with cancer whereas in the U.S. one out of four people are coming down with cancer! As to whether chelation would help cancer victims when they are already suffering from the disease is another question. Certainly using laetrile in the chelating solution should help like it did the millionaires.

Doctors in our country are under the complete control of the monopolistic "establishment" medical profession and have to *only* use the treatments "approved by the monopoly," and God help any doctor who deviates as they will be viciously attacked and many will lose their license to practice medicine. As a result many people are going to Mexico, or West Germany. Dr. Hans Nieper, M.D., in West Germany has been more successful in treating M.S. than anyone else I know of. He also has more success in treating cancer, heart problems, etc.

This situation, where we have a dictatorial monopolistic medical profession, al-

lowing us to use only the type of treatment they approve of, has got to stop. Too many of our people are suffering who they could be helped. Many doctors perform a heart bypass operation when arteries are not completely clogged so they will make \$\$\$.

Chelation costs about \$75 per treatment and helps to clean out *all* the arteries and now we know it helps prevent cancer too! Dr. E.W. McDonagh, M.D., has treated thousands of patients with chelation therapy for over 20 years and cannot remember one of his patients coming down with cancer! Chelation removes the toxic poisons such as lead, mercury, cadmium, etc., from the body.

Personally, if I ever had cancer I wouldn't allow any allopathic doctor to treat me, but would seek out a doctor who used nutritional therapy, chelation, laetrile, etc. Dr. Harold Manner, Biochemist, treated mice with laetrile by itself and it helped, but he found that by adding Vitamin A and proteolytic enzymes it worked real well when the mice came down with cancer. The experiments were done at Loyola University in Chicago.

Now you have found out that cancer is treated with *natural* substances such as vitamins, enzymes, herbs, chelation, etc., instead of the surgery, radiation and poisonous chemotherapy that will probably kill you if the cancer doesn't! What any individual decides to do is up to him.

The following are some of the references from which I have obtained information: *Conquest of Cancer* by Virginia Livingston, M.D.; *Oxygen Therapies* by Ed McCabe (I forgot, Nobel Prize winner Dr. Otto Warburg stated that cancer cells cannot live where there is oxygen!); *Chronic Fatigue Syndrome* by Jesse Stoff, M.D. and Charles Polligrini, Ph.D.; *World Without Cancer* by G. Edward Griffin; *Cancer Therapy, 50 Cases* by Max Gerson, M.D.; *You Don't Have to Die* by Harry Hoxsey, M.D.; *Freedom From Cancer* by Mike Culbert; *Murder by Injection* by Eustace Mullins; *Politics of Cancer* by Samuel Epstein, M.D.;

Chance to Live by Stanley Leitner (Dr. Ray Ever's cases); *(Laetrile) Therapy* by Bruce Halstead, M.D.; Information from other doctors including Drs. Koch, H. Ray Evers, Ernest Contreras, M.D., Han Neiper, M.D.; *Cancer, One Man's Fight to Control Malignancy* by Robert W. Stickle; A Program for Prevention and Detection of Pre-Cancer, with nutritional factors for the advanced cancer patient by the late Walter Ermer; *Laetrile Case Histories* by John A. Richardson, M.D., and Patricia Griffin, R.N. I could go on and on with more information from Greece and other countries.

The following is an outline of what members of Cancer Victims Anonymous used to treat themselves:

1) Food you must not eat: Coffee, tea, milk, alcoholic beverages, salt (use magnesium chloride salt substitute), sugar (very bad for cancer), tobacco. Only eat beef, lamb, fish, and cut off fat, must go on *calcium free, fat free diet*, no food cooked in micro-oven, *no city water*, stay away from TV, X-ray radiating equipment, and computer terminals.

2) 30,000 units water soluble vitamin A, proteolytic enzymes and five apricot kernels morning and evening (rule of thumb is that each kernel has 100 mg. laetrile in it). Slice of raw pineapple at each meal - important!

3) During the day take: 10,000 units vitamin C, kyolic garlic, Co-enzyme Q-10 25 mg. or more, Germanium 500 mg. or more, one DDS-L Acidophilus, L-Glutathione (Jo-Mar Laboratories) with Chelated Selenium 250 mcg., Hydrogen Peroxide (food grade 35%) one drop in juice or water per day.

4) The following should be made into tea and taken when convenient: raw cabbage juice; astragalus; lingustum; Purple LaPacha - very important; glass of juice three times a day containing half raw carrot juice and half ripe avacoda juice - also important.

5) In Mexico they give enzyme enemas to stimulate the liver so it helps toxic poisons

leave the body. They inject one cup of liquid enzyme and the patient holds it inside his body for as long as possible. They say the portal vein absorbs the enzyme and that vein goes directly to the liver. Since we don't have the enzymes used we have used a cup of warm coffee as the caffeine stimulates the liver. People who are very ill find that they will become sick and vomit when first doing this as the liver evidently makes the body release so much toxicity at once that this happens. People in that condition then take the coffee enema about once every other day, but gradually increase until they do so three times a day for about six months and then decrease to once a day.

6) Summing up: If you don't want to treat yourself you can obtain names of M.D.s who use non-toxic therapies all over the world and all sorts of information on non-toxic therapies from: Cancer Control Society, 2043 Berendo Street, Los Angeles, CA 90027; phone: 213-663-7801. There are many books on cancer by medical doctors available and most health food stores have them. All of the vitamins, teas, etc., mentioned are available from Weber's Health Food Store, 18400 Euclid Avenue, just east of Green Road, or Nature's Best Health Food Store, 14822 Pearl Road in Strongsville, Ohio 44136.

I just cannot stand aside and remain quiet when I see what is happening to victims of cancer. As St. Augustine said: "He who conceals a useful truth is equally guilty as the perpetrator of an injurious falsehood!"

Dr. H. Ray Evers, M.D., had to flee from Alabama to Mexico to continue using chelation, etc., because of harassment by the "establishment medical people." His address is: 424 Executive Center Boulevard, Suite 100, El Paso, TX 79902; Phone: 915-534-0272; and his clinic is in Juarez. He was one of the first to use chelation therapy. Of all my friends not *one* knows of one person successfully treated for cancer in the U.S. by the monopolistic establishment medical profession! What a disgrace!

Unwanted Babies

Jay Berkowitz, Lyndhurst, Ohio

Baby boomers,
Early bloomers,
Little kids doing it all night,
Liberals condone it,
Everybody's known it,
Pregnancies are going out of sight,
Unwanted babies,
A worse plague than rabies,
Morality is no place to be seen,
The tax payers hate it,
While idiots debate it,
It makes me want to cry or start to scream,
Some people say abort them,
While others say support them,
The two groups like to scream and fight,
A talk show says to let them,
Politicians say forget them,
No matter what we do it won't be right.

Frozen Haste

Charlotte Sky, Monterey, California

To complete the items on my list
I rush and run,
But then I wonder
Do I simply run in place?
Walking through the membrane
Of my frozen haste
I approach the hollow center
To find
A timeless world
Where I can lose myself in catlike contemplation
Of water dripping
And can feel the sun upon my skin
And breathe the scent of pine.
