

Kicking Cancer's Ass ~ Oxygen and Organic Calcium

Thomas W. Lippitt, Rinard Mills, Ohio

Since 1974 I have been looking for a successful treatment for cancer and almost all that I have found turned out to be failures. As a result, I became, as my name implies, a "doubting Thomas" and thoroughly researched every new treatment someone would introduce.

Finally we have a successful treatment not just for cancer but for almost every so-called 'incurable' disease. Here is the proof that anyone can easily understand.

1. Dr. Otto Warburg, M.D., won the Nobel Prize in 1931 by proving that cancer cannot survive where there is oxygen, and hence cancer is an anaerobic disease.

2. Over the years almost every disease imaginable has been proven to also be anaerobic and since about 1907 they have been successfully treated using ozone that has first been bubbled through teatree oil and then inhaled.

3. I have an article written in 1907 by Dr. William D. Neel, M.D., that explains how he used ozone to successfully treat diseases. One sheet (see *graphic on next page*) lists all the diseases that have been successfully treated using ozone.

4. pH is the measurement of how acidic or alkaline a person's body is. If a person's pH reading shows that he is alkaline, then he can absorb oxygen 100 times better than a person whose pH shows the person is acidic. Thus, terminal cancer patients usually have a pH of 4.5 showing that they are very acidic. Therefore, a pH test can give us a lot of information about the state of our health.

5. Several cultures throughout the world live to a ripe old age for the simple reason that their drinking water contains *organic calcium* that causes them to have an alkaline level of pH 8.6.

6. Now you know and understand that cultures that take *organic calcium* into their bodies do not come down with heart disease, cancer, lupus, M.S., Parkinson's disease, Alzheimer's disease or any other so-called 'incurable' diseases.

7. One of my club members who is 72-years-old and was acidic came down with bronchitis. She breathed ozone after it was bubbled through teatree oil for ten minutes in the morning and ten minutes in the afternoon and in four days her bronchitis was gone. How much better would that treatment have worked if her pH showed that she was alkaline?

Since it is the organic calcium from the coral that also has many other trace minerals that a person needs to remain healthy, that coral is being mined and shipped all over the world. There are different grades of coral and some are better than others as they have the correct amount of magnesium in them in relation to the calcium. I have the best quality "coral calcium" available for anyone who desires to use it.

When you swallow coral calcium it is digested within ten minutes whereas the calcium you get from turms or calcium aspartate, etc., takes 10 to 20 hours to be digested and then only about 3% is digested and thus you are almost always acidic. The company from which I obtain coral calcium has what is called a "cancer kit" that has been used by many so-called "terminal" cancer patients who then survived.

The complete details of how and why coral calcium plus vitamins and other minerals work so well in treating so-called incurable diseases are probably confusing to the average citizen. However, for those who wish to wade through the details, they can obtain the book, *The Calcium Factor* by Robert R. Barefoot and Carl J. Reich, M.D. Robert R. Barefoot is a top scientist in the field of biochemistry and Dr. Reich proved that coral calcium works, as it worked for many of his patients.

I also have quotes from people who have used coral calcium to treat cancer and *proof* from the Bible that in the "end times" we will all be poisoned by the pharmacists. Almost every day you see prescription drugs advertised over tele-

vision that have terrible side effects. The reason you need a prescription for those drugs is because they are *poisonous to a person's body*.

The information contained in this article is for educational purposes only and not to be considered medical advice in any way, shape or form.

I have sought out and found what I believe to be the best quality coral cal-

cium available.

Since coral calcium keeps people healthy so that they do not come down with diseases like we do in our country, naturally, using coral calcium *before* you come down with any disease is what the wise people in our country are now doing so that they too will live a healthy life and possibly live to 121!

**18th in a series on
cancer and health
and healing**

In previous segments:

Especially for those who have been told to go home and die by self-appointed omnipotent medical experts, or who have loved ones being told there is no hope to become healthy again, *Active Voice* Publisher Ron McEntee began his series on cancer and health and healing:

"...One thing I do believe with all my heart is that fear is itself afraid of love. Fear will run from love because it will be destroyed by it. And the first step of being destroyed by cancer is to allow fear to pervade rather than love, and to allow hope to be exterminated rather than nurtured so that it can blossom and grow and bear fruit and heal..."

Part Two of "Kicking Cancer's Ass" included McEntee's emphasis on "The power within" along with a story concerning the history of Essiac called "Ojibwa Herbal Tea: Indian myth or healing remedy?"

In Part Three, "Christine's story" was told, a powerful first-person narrative detailing one teenager's bout with cancer, her subsequent victory, and her message to fellow cancer fighters.

In Part Four, "Let the healing begin," McEntee re-aired his previously published reference guide, "Here's to Your Health," for those wishing to begin a self-study into little publicized natural medicinal methods. Reference contacts were shared as well as an urge for people, especially in matters of health and healing, to "always believe in yourself. Believe in your own abilities to love and to be loved, to care and to be cared for, and to search for and draw your own judgements about 'the truth.'"

Part Five featured "Caring about curing cancer," a response to this series from an *Active Voice* reader.

Part Six focused on a "miracle" herb called pau d'arco and its abilities and history of fighting cancer.

Part Seven talked about media and medical monopolies and the dangerous interplay between the two. It also mentioned the names of herbalist Dr. John R. Christopher, scientist Royal Raymond Rife, and "unqualified" healer Harry Hoxsey, whose suppressed healing success stories should and shall be told.

Part Eight talked again of Christopher and offered feedback from readers on pau d'arco and suppressed healing methods.

In Part Nine, Bob Houchins of Port Charlotte, Florida narrated the story of Royal Raymond Rife, "one of the most fascinating and horrifying tales ever told." Rife was an American scientist who discovered a method and created an instrument that cured cancer in the 1930s. His reward was similar to that given to anyone who attempts to put genuine healing and caring over money and power. Both he and

his answers to the cancer problem were driven underground.

Part Ten highlighted and urged self studies of herbal healers Dr. John R. Christopher and Dr. Richard Schulze and the Sam Biser *Save Your Life Herbal Video Collection*.

Part Eleven told the amazing story of Harry Hoxsey, who took a handed-down herbal remedy and opened up his first cancer clinic in Illinois in 1924. By the 1950s Hoxsey had clinics in 17 states, but by 1963 the medical establishment and friends in government finally forced him to take his services to Mexico, where Americans who know about it still journey to rid themselves of cancer.

Part Twelve covered "The Legacy of Edgar Cayce." Emphasis was placed on "the father of holistic medicine's" mind/body/spirit' philosophies and information was shared about related Cayce 'readings,' Cayce health products, and Cayce's Association of Research and Enlightenment, Inc.

Part Thirteen, a submission from an *Active Voice* reader, was a discussion and testimonial involving "Natural Hygiene," also referred to as "Life Science," a health system that teaches how to live in harmony with nature and our biological makeup.

Part Fourteen offered testimony from a former officer of Cancer Victims Anonymous and railed against the strangle-hold the AMA and FDA and others have upon consumer choices in medicine.

Part Fifteen, written by long-time *Active Voice* reader and medical researcher Thomas W. Lippitt, covered "The battles beyond 'the war': A history of suppressed cures & healings."

Part Sixteen told the story of German-born doctor Max Gerson's method's of successfully curing cancer, as well as his battle against dictators ~ a famous one in Europe named Hitler and a secret one in America still thriving today.

Part Seventeen introduced the latest "alternative" in cancer therapies. Naturopath Thomas W. Lippitt discussed coral calcium and ellagic acid and offered numerous references for readers to research on their own.

Future segments will cover more centered healers and suppressed information. Also included here will be your stories, comments and questions. Please take part and join a genuine effort to let the healing begin.

The vaccination epidemic

Thomas W. Lippitt, Rinard Mills, Ohio

During the 1920s and 1930s it was the practice of the allopathic medical doctors to remove people's tonsils when they were infected. Recently it was discovered that tonsils protected people from coming down with polio. Now you know what caused the polio epidemic!

In order to prevent people from coming down with polio the same doctors vaccinated people with a vaccine that was made by growing it on the kidney cells of monkeys. After over 100 million people had been inoculated, Dr. Bernice Eddy, M.D., who was the senior vaccine safety tester at the National Institute of Health, discovered that the polio vaccines grown on monkey kidneys had over 200 viruses in them and that one such virus labeled SV-40 caused cancer!

Dr. Eddy called a news conference in 1959, without first obtaining permission from her superiors at the N.I.H. and exposed the fact that the polio vaccines made from monkey kidneys caused cancer. Harvard Medical School confirmed this fact at a later date. Now you know what caused the cancer epidemic!

It gets even worse. About 1978 under President Ford the government said we had an epidemic of African Swine Flu and urged everyone to obtain a flu vaccination to keep from coming down with that type of flu. Later, it was discovered that the African Swine Flu vaccination also had the SV-40 virus in them. Naturally this caused more cancer.

It is now also very clear that the hepatitis vaccine given to homosexuals had the AIDS virus in it. Originally the Centers for Disease Control claimed that only four percent of the homosexuals who had been given the hepatitis vaccination came down with AIDS, but four years later they admitted that sixty percent had come down with AIDS and from then on they refused to give any percentages because it had really reached 100%.

Many researchers claim that the Sudan Infant Death Syndrome (SIDS) is caused by the vaccinations given to newborn babies.

Because of a shortage of flu vaccines in our country the Food and Drug Administration allowed the Medeva Company in Great Britain to sell an estimated 200 million doses of flu vaccine that they made. Medeva's Liverpool plant was found by the FDA to be producing vaccines under filthy conditions.

The British government recently recalled Medeva's oral polio vaccine (OPV) as it had been grown "from bovine material of United Kingdom origin" contrary to mandated vaccine production protocols. The Medeva Fluvarin vaccine, produced in the same plant that produced the recalled OVC may have the potential of opening the floodgates of a "mad cow" epidemic in our country. Mad cow disease has already spread from England to France and now both Germany and Japan have prohibited any beef from England to come to their countries.

Prion disease is called "mad cow disease" in cattle, "scrapie" in pigs and sheep, "whirling disease" in fish and "wasting disease" in deer and elk. In

humans it is called Creutzfeldt-Jakob Disease (CJD). Some medical professionals believe that possibly up to 200,000 U.S. citizens have been misdiagnosed with Alzheimer's disease when they actually have CJD. As of the date of this piece I do not believe that the FDA has ordered that Fluvarin be tested to see if it is contaminated with mad cow disease! Already, in our country, free-ranging deer and elk in Northeastern Colorado and Southeastern Wyoming are infected with a prion disease and there have been newspaper reports that at least three people have died from this disease from eating venison from deer hunted in these regions.

The medical profession still does not know all the ways that prion disease may be transmitted. We do know that 85 zoo animals have now been infected ranging from bison and chetah to antelopes, lions, tigers, pumas and even house cats owned by people in Great Britain.

We also know that in the areas of Africa where the World Health Organization gave the highest percentage of smallpox vaccinations there is also a much higher percentage of AIDS and the same is true for other countries such as Brazil and Haiti. A British investigator proved that the AIDS virus was in the smallpox vaccinations given by the World Health Organization.

Epidemics and wars are purposely being promoted by a few "elite" "ultra wealthy" "power hungry" individuals who want to rule the whole world and desire to murder untold billions of people as they believe that the world is overpopulated! Proof of this is in the book, *Full Disclosure*, by Dr. John Coleman, a former British Intelligence Agent, and Dr. Gary Glum.

Complete proof that the polio vaccines contain SV-40 that causes cancer will be found in the book, *Mary, Ferris & the Monkey Virus*, by Edward T. Haalam. Other sources are: *SunCoast/Florida ECO Report*, Dec/Jan 2000/01 and *The Spotlight*, Nov/Dec 2000 edition.

So you don't want to believe me? Stop and think. Do the doctors know what is in the flu vaccinations that came from Great Britain? What if I am correct? What will millions of people do if they are all dying? Sue the Medeva Company? Sue their doctor?

They will not have much luck suing as they will die before the court makes any decision. Perhaps their well-meaning doctor gave himself a flu shot and is also dying.

On the other hand, *this time* you just might be lucky and the flu vaccination turns out not to have the mad cow disease in it. From past history of vaccinations giving us the cancer epidemic I myself would rather boost my immune system rather than get any type of vaccination. But that is just my opinion.

(Those who wish to contact Thomas W. Lippitt for more information on his articles in this month's issue should feel free to call or write Active Voice.)

Why are we cheering politicians promising prescriptions?

Al Gore and George W. Bush, painted by the centralized media as our only two choices in the most recent presidential election, were not surprisingly vying for votes by promising to "give" the people something they don't need; something the people should be in charge of themselves, yet still something the blind masses won't stop whooping and clapping about. Those who wish to still think for themselves and also control their own health should do some checking up on prescription pills, the drug industry, and interaction between the powerful in medicine, the media and the government. Simply start by studying books which list the endless side effects and dangerous interactions of the very prescription drugs your favorite politicians would like to let you buy for others with your money. It's hard to believe "We the People" have become this dumb. In essence we are allowing questionably financed political party puppets to promise to allow us to poison one another with our own tax dollars. And "watchdogs" from "the free press" lie eerily silent.

~ Ron McEntee, Publisher

In restaurants, coffee shops, taverns and salons; in the workplace and halls of higher learning, the conversations go on amongst "We the People." We wonder who tells the truth anymore, who we can trust, and who performs in their profession because they care or because they seek riches and prestige. Month after month for 13 years this newspaper has been sounding the voice of "the people" like no other newspaper in existence, bringing unadorned, unedited free and open communication. The survival of *Active Voice*, like the survival of the ideals and principles this country was founded on, depends upon the vigilance, intelligence, awareness and support of "the people." Make a statement beyond words. Get off your ass. Show your support. Use the order blank on page eight of *The Weekly Farce* section and subscribe now.
